Question 1 | Correct Mark 1.00 out of 1.00

Problem Statement

Given an array of 1s and 0s this has all 1s first followed by all 0s. Aim is to find the number of 0s. Write a program using Divide and Conquer to Count the number of zeroes in the given array.

Input Format

First Line Contains Integer m – Size of array

Next m lines Contains m numbers – Elements of an array

Output Format

First Line Contains Integer – Number of zeroes present in the given array.

Answer: (penalty regime: 0 %)

```c
#include <stdio.h>

int countZeroes(int arr[], int low, int high)
{
    if (low > high)
        return 0;

    // If last element is 1, there are no zeroes
    if (arr[high] == 1)
        return 0;

    // If first element is 0, all remaining elements are 0
    if (arr[low] == 0)
        return high - low + 1;

    int mid = (low + high) / 2;

    // Middle is 1, search right half
    if (arr[mid] == 1)
        return countZeroes(arr, mid + 1, high);

    // Middle is 0, search left half
    return countZeroes(arr, low, mid);
}

int main()
{
    int m;
    scanf("%d", &m);

    int arr[m];

    for (int i = 0; i < m; i++)
        scanf("%d", &arr[i]);

    int result = countZeroes(arr, 0, m - 1);

    printf("%d\n", result);

    return 0;
}
```
